

ADOB® Na

Characteristics

ADOB® Na is a multinutrient, multifunctional liquid fertiliser specifically designated for the foliar feeding of sugar beet crops. It contains nitrate-nitrogen (which is the preferred type of nitrogen for this crop) and very high levels of sodium (Na, 10%). The micronutrients boron (B), copper (Cu) and manganese (Mn) are also present. Copper and manganese are chelated by the classic **EDTA** agent, while boron (which cannot be chelated) is present as water-soluble, inorganic component. This ensures that all nutrients are readily and quickly available to sugar beet plants.

Interestingly, it has been proven that in sugar beet, as well as in other natrophilic species (such as beetroot and turnip) and potato plants, sodium can replace potassium in a number of functions, such as maintaining plant osmoticum for cell enlargement and acting as an accompanying cation for long-distance sugar transportation within plants.

ADOB® Na ensures the optimal development of sugar beet roots and increases their sugar content. It also boosts plants' vigour, health and tolerance to occasional water deficit stresses.

-  CE fertiliser
-  liquid fertiliser
-  high sodium content
-  **EDTA** chelated
-  100% chelation of micronutrients
-  enhanced resistance to draught and water stress
-  enhanced photosynthesis
-  increased yields and improved yield quality

Composition

Composition – ADOB® Na

Nutrients	Symbol	Content [% w/w]	Content [% w/v]	Content [g/l]	Form
Total nitrogen	N	4.5	5.7	57.0	
– nitrate nitrogen	N-NO ₃	4.5	5.7	57.0	
Sodium dioxide	Na ₂ O	10.0	12.6	126.0	soluble in water
Boron	B	0.5	0.63	6.3	soluble in water
Copper	Cu	0.05	0.063	0.63	chelated by EDTA
Manganese	Mn	0.2	0.25	2.5	chelated by EDTA

Packaging: 5, 10, 20, 1000 l

Stability of the chelated fraction guaranteed at pH range 4-9.

Application recommendations

Application recommendations – ADOB® Na

Crops	Number of applications per season	Crop phenological stage	BBCH stage	Product application rate [kg/ha]	Spray solution application rate [l/ha]
 Sugar beets	2	4-6 leaves	14-16	2-3	200-300
		inter-row closure	32-39	2-3
